

LUXE SAFES

CUSTOM JEWELRY SAFES

Enrich your home with luxury & security

The Luxe Difference

Every safe is uniquely designed to satisfy the taste, storage, and security requirements for each client.

We realize that a safe is a one-time investment, and a single solution will not work for everyone. That is why we customize every safe rather than offer cookie cutter designs that are limited to a few models.

We don't sell what we have, we build what you want.

Fashion. Function.

The Luxe Philosophy

In a world of mass production, we offer something different: Artisan Craftmanship.

Only the strongest and finest materials are used in the manufacturing of our jewelry safes. Almost every safe is unique in size, color, and configuration, so it can be installed fashionably anywhere in your home that will provide convenience. Even our jewelry trays are designed just for you. We literally design the safe around your collection and your space.

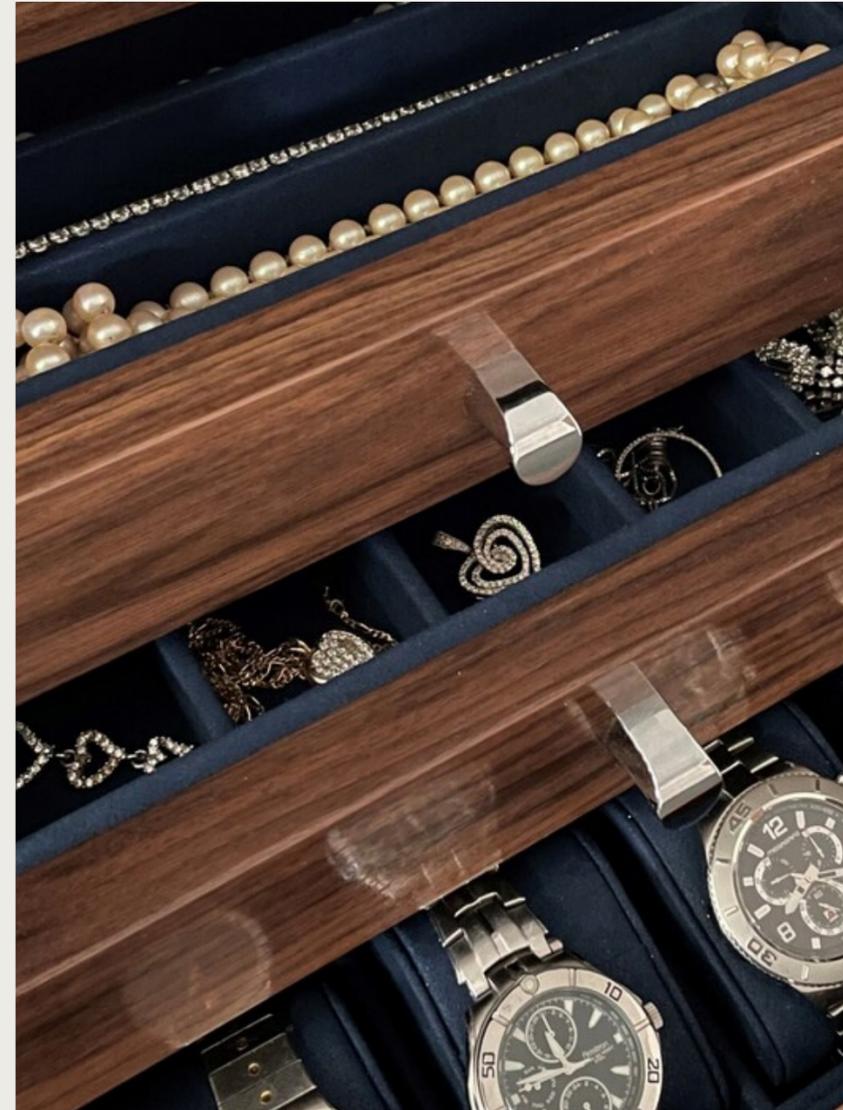

If it's worth protecting,

Protect it well.

The Luxe Approach:

In a lifetime of special occasions, you've acquired an extravagant and irreplaceable collection of jewelry and watches. We appreciate your concern for protecting your valuables, and have devoted our lifetime to design the world's strongest and most beautiful jewelry safes.

The luxury of security.

One of a kind

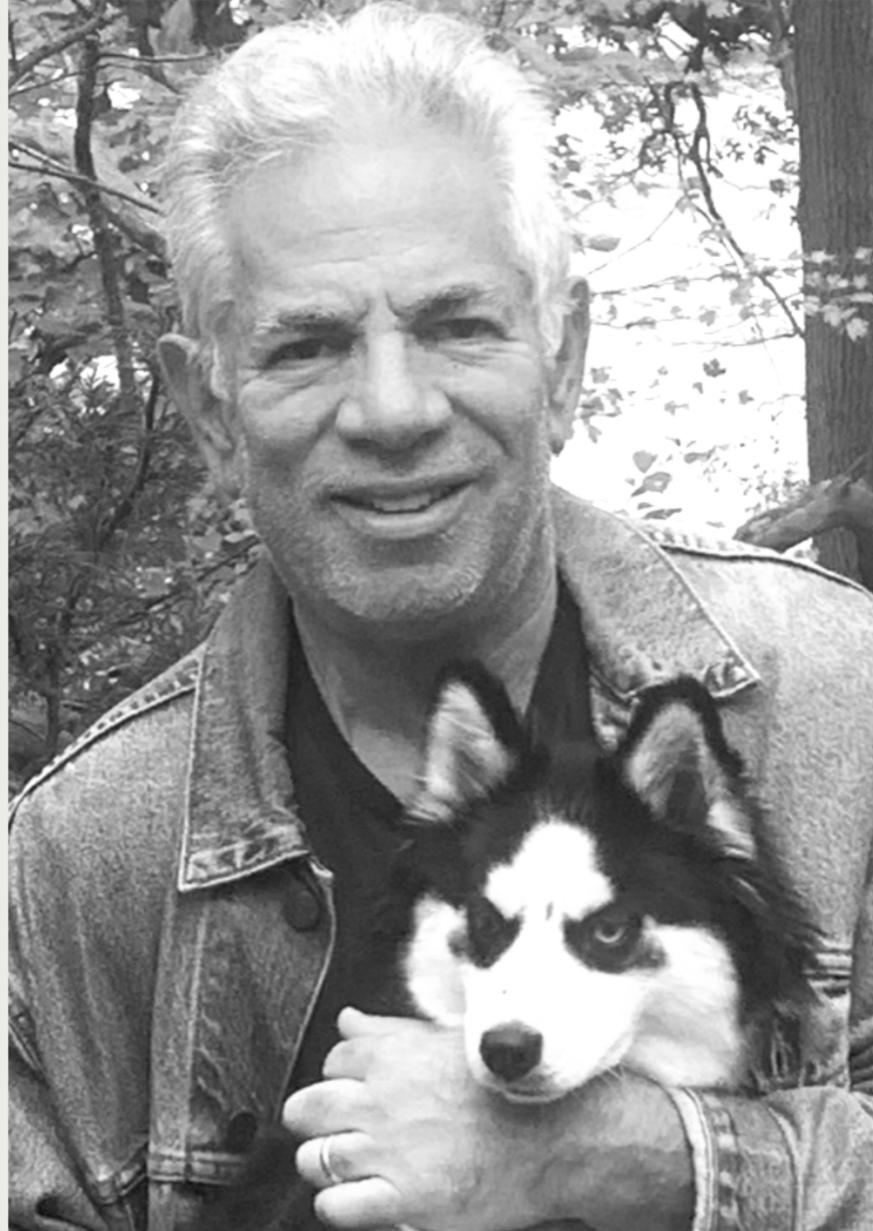

Designed just for you

No two diamonds are alike, and neither is your jewelry collection. Nobody's home is designed like yours either. We take all of this into consideration when we design the perfect jewelry safe to properly safeguard your valuables while reflecting your personal style.

Uniquely yours.

Your success is reflected in the luxuries that surround your life. There is nothing common about anything you do, and there is nothing typical about the things we do to satisfy your discerning taste.

CEO & Founder

My name is Robert Tompkin, and I am the founder of Luxe Safes, Inc., a safe and vault company that specializes in manufacturing high security custom jewelry safes for homeowners.

For the past twenty years I have worked with many of the world's most renowned high-end residential architects and interior designers. They place their confidence in our ability to protect their clients' most valuable possessions in the strongest and most beautiful jewelry safes. I have also worked direct with thousands of homeowners who have entrusted us to secure their irreplaceable collection of jewelry, watches and family heirlooms.

It is that respect for your valuables and your trust that we are committed to manufacturing the world's strongest and most beautiful safes.

— Robert Tompkin, President
